

An audit can be an overwhelming and daunting task, from arranging one to being one of the auditees. Some of the many questions that may be encountered include:

- Do I need to have an audit?
- Cost versus value
- Implications from findings
- Regulatory versus internal improvement
- Where can I find an auditor?
- What will the process entail?
- Time factor
- Is the auditor going to be practical?

Viridis has a team of auditors certified through Exemplar Global. We have undertaken over 100 audits ranging from regulatory, internal process improvement, and pre regulatory or pre certification preparedness. We have undertaken audits for large metropolitan utilities (e.g. Sydney Water and Seqwater), regulators (e.g. QLD DNRME and Victoria DHHS), regional organisation of councils (e.g. Far North Queensland ROC), and medium and small remote providers.

Through working with such a diverse client base, we are able to provide practical and tailored suggestions and recommendations, where needed. The experience brought in by our auditors will make the auditees feel at ease during the process.

Auditors

- 4 x Lead auditors certified through Exemplar Global – provides contingency
- >100 audits between the auditors
- Experienced and practical
- Skilled facilitators

Areas

- Water quality (drinking and recycled)
- Environment
- Infrastructure performance
- Licence and regulatory compliance
